

Information brochure

AutomaticBlue

We are a rapidly growing company, specializing in providing innovative solutions in the field of integration of industrial automation and machine building.

Our priority is to comprehensively implement modern technologies, that increase the productivity and efficiency of manufacturing plants.

Using advanced software that works with CAD systems, we create precise models of machines, production nests and entire production lines, tailored to the individual needs of our customers.

Our solutions combine an innovative approach with the latest technologies, ensuring the highest quality and optimization of production processes.

Scope of operation

We design and manufacture equipment for various industrial sectors, always taking an individual approach to each order.

Our Services

Machine design

Industrial automation

PLC & HMI programming

Safety of machines

Mechine design

Creation of technical documentation

Design of pneumatic systems

Design of hydraulic systems
and proportional techniques

Design of electrical systems

Selection of electric actuators

Strength calculations and modal analyses

Industrial automation

Automation integration

Design and implementation of control systems

Analysis of system dynamics

PLC & HMI programming

PLC & HMI programming

SCADA visualization programming

Drive programming and tuning

Neural networks and machine learning

Safety of machines

Risk analysis based on standard PN-EN ISO 12100:2012

Risk analysis based on standard EN ISO 13849-1:2006-2

Adaptation of machines to minimum requirements

Modernization of safety systems

AutomaticBlue

In our company we focus on innovation, reliability and partnership approach to cooperation.

We carry out each project individually, adapting solutions to the actual needs and expectations of our customers, to ensure the highest quality and effectiveness of implementation.
